- Hosted 2 leadership conferences with over 500 attendees and lead student initiatives.
- Worked with a team of 16 Charter Members to host monthly community events.
- Lead 6 leadership/emotional intelligence workshops and coordinated large food lines.

TOP PROJECTS

Until After

Beautiful private journaling app that can unlock when you die. [\(Link\)](#)

- Refactored axios requests to use Socket.io library for realtime auto save on text.
- Utilized CSS Animation Keyframes to allow users to easily digest thousands of journals.

Voters Guide

View, save and share your votes easier than ever. [\(Link\)](#)

- Took wireframes from conception to implementation in Node MVC architecture.
- Used Passport JS to authenticate users and deployed database on MLab.

DiscoverTab

Automated time tracking Chrome extension. [\(Link\)](#)

- Used Chrome Storage and Tabs API to store all your website time spent in a dictionary.
- Used vanilla JavaScript to flawlessly track time and modify the DOM.

Higher Hires

Bringing a new dimension of biometric data to video interviews. [\(Link\)](#)

- Worked in a team of 3 to bring a new dimension of biometric data into video interviews.
- Used Microsoft Cognitive Services API to retrieve biometric data from video.

AWARDS

Make School: "WakaTime Winner" & "Full stack Mentor Recognition".

ScarletHacks 2017: "3rd Place" from Major League Hacking, for DiscoverTab. [\(Link\)](#)
